

Dear FCC,
You need to reject NAB's petition 04-160 immediately. XM Radio is the next generation of Radio which should offer new services like traffic and weather. Just because current am/fm radio broadcasters, of whom offer lousy programming, can't keep its listeners, doesn't give them the right to shut down XM Radio services. It is clear that the big guns at Clear Channel and other radio conglomerates are teaming up because they know that they have destroyed radio. And you, the FCC, is to blame for this too by allowing consolidation of stations to occur in markets. Do not make another mistake by allowing the NAB to kill XM Radio's ability to offer valuable information to its listeners.

I will be sending this same letter to my congress people and the president.

Don't make the biggest mistake of the FCC's existence. Reject this petition and do the right thing.

Peter P. Geremia
